Project Experience

Final Year Project	**School E-Leave Management System** Jun 2020 – Aug 2020 Project description: I finish it with PHP and MySQL in the localhost. The system got 3 different modules, namely the admin module, student module, and teacher module. Each module performs different tasks. For example, the admin module allows admin to manage students' leave applications, leave balance, and view leave reports. The teacher module allows teachers to view student leave records and lists, and the student module allows students to apply for leave applications.
Final Assignment	**Watch Shop E-commerce System** Jul 2020 – Sep 2020 Project description: I finish it with c# and ASP.NET. The system got 2 different parts – The admin part and the customer part. Admin part able admin to add, update, delete & view a product, and view customer order details. Customers able to login after register and buy products and pay with PayPal sandbox.
